

Supplementary Data

Supplementary Fig. 1: TPS concentration screening.

(A) TPS at 0.0625 mg/mL increased NC group cell viability, whereas 0.125 and 0.25 mg/mL decreased cell viability. (B) TPS at 0.025, 0.0375, 0.0625 mg/mL increased MC group cell viability, whereas 0.125 and 0.25 mg/mL decreased cell viability. ($n=3$)
