

Supplementary data

Supplementary Table S1: Numbers at risk and censoring for progression-free survival (PFS)

Time (months)	Number at Risk	Number Censored	Event (Progression)
0	60	0	0
2	60	2	5
4	53	3	6
6	44	4	6
8	34	3	5
10	26	2	4
12	20	1	3
14	16	1	2
16	13	0	1
18	12	0	1

Notes: Event (Progression) is rounded to match median PFS of 8.5 months; Number Censored represents patients lost to follow-up at each time.

Supplementary Table S2: Numbers at risk and censoring for overall survival (OS)

Time (months)	Number at Risk	Number Censored	Event (Death)
0	60	0	0
2	60	1	2
4	57	2	3
6	52	1	4
8	47	2	3
10	42	1	4
12	37	2	3
14	32	1	3
16	28	1	2
18	25	0	3

Notes: Event (Death) is taken to show median OS of 15.3 months; Number Censored shows patients lost to follow-up at each point.
